

Website Corrections & Improvements

1. Cancellation Flow – Booking Confirmed by Customer

Standard flow:

- When a booking is Confirmed and the customer cancels, update the status in this order:

Confirmed → Refunding → Refunded

- If cancellation happens after a team has already been assigned:

If possible, follow the same flow as above: Confirmed → Refunding → Refunded

Otherwise (e.g. if the order was already marked Service Complete), change the status from Completed to Refunding, then to Refunded, accordingly.

The image displays two screenshots of the 'Booking Details' page on the 'HOURX HOME' website, illustrating the cancellation flow for a confirmed booking.

Top Screenshot (Confirmed Booking):

- Header:** HOURX HOME, Booking Details, OR17879201567256663, Cancelled button.
- Progress Bar:** 1. Booking-created (checked), 2. Service-confirmed (active), 3. Service completed.
- Service booked:** 194.25 AED.
- Service Details:** AC Repairs & Installation, Specifications, Duration: 1.

Bottom Screenshot (Refunding Booking):

- Header:** HOURX HOME, Booking Details, OR17877466421654648, Refunding button.
- Progress Bar:** 1. Booking-created (checked), 2. Service-confirmed (active), 3. Service completed.
- Service booked:** 84.00 AED.
- Service Details:** Regular cleaning, Specifications, Duration: 1 hour, Number of People: 1.

2. Email Link – Desktop Fallback

- Issue: The support email link only opens automatically if the visitor's computer has a default mail app set up. Most desktop users check email through a browser (Gmail/Outlook web), so nothing happens when they click it. This affects both the FAQ page's "Still need help?" box and the "Contact Us" section in the homepage footer.
- Suggested fix: Add a small "Copy" button next to the email link in both places, so users can copy the address and paste it into their webmail if clicking doesn't open anything.

3. Terms & Conditions - Edit

Section 6 in the Terms & Conditions ("Cancellations & Refunds") also covers rescheduling rules, so the heading should be updated to **"Cancellation, Rescheduling & Refunds"** to match its content. No change needed to the text underneath — just the title.

HourX - Terms & Conditions

1. Acceptance of Terms

By accessing or using the HourX platform, you agree to be bound by these Terms & Conditions.

2. Platform Description

HourX is a professionally managed on-demand home services platform operating in Dubai.

3. User Obligations

Users must provide accurate information and comply with applicable laws.

4. Services & Booking

Services are provided by vetted third-party professionals coordinated through the platform.

5. Payments & Fees

All payments are processed via Stripe. HourX does not store card information.

6. Cancellations & Refunds

Refunds return to the original payment method and typically take 5–10 business days.

- A 10-minute grace period after booking permits cancellation (less the non-refundable Stripe fee) or free rescheduling.
- Cancellation more than 6 hours before service is refundable less the Stripe processing fee; cancellation within 6 hours is non-refundable.
- Rescheduling is free more than 3 hours before service and unavailable within 3 hours, except during the 10-minute grace period.
- Stripe fees are 2.9% + AED 1 for local UAE cards and 3.9% + AED 1 for international cards.

7. Property Damage Claims

Suspected property damage must be reported to HourX within 24 hours after service, with photographic evidence where possible. HourX facilitates investigation with the independent provider and any applicable insurer, without guaranteeing compensation.

4. Order Details – Email Icon Not Sending Customer Notification

- Issue: In the back-office Order Details view, clicking the email icon next to Edit Order / Generate Invoice / Print doesn't notify the customer, even after the order has been placed.
- Required fix: Clicking this icon should send the customer a confirmation email/notification for that order. Please check what the icon is currently wired to do (or if it's not wired up at all) and connect it to the actual notification flow.

5. Customer Details Card Not Updating After Edit

- Issue: After editing the customer's name and booking notes, everything updates correctly — the edit form shows the new values, and so does the customer-facing side. But the "Customer Details" card on the Order Details page (back office) still shows the old name, "test09."
- Fix needed: Make this card show the updated name too, just like the rest of the page already does.

7. No Way to Tell a Remark Was Added

- Issue: After saving a remark (like "Rescheduled"), the Order Management list looks the same as before — no sign a remark was added.
- Fix needed: Show something simple, like a color change or small badge, next to orders that have a remark.
