

1. Website Service Name - Middle

Please move the service headings to the middle, directly above the prices.

2. Bug: Cancellation flow missing confirmations

- Clicking "Cancel Booking" cancels it instantly — no confirmation popup before or after on the Booking Details Page.
- No cancellation policy shown when clicked the Cancel Booking in the Booking Details Page.
- "Closed" step stays pending after cancellation. Either remove it, or auto-mark it active/complete once cancelled.

Reference: Booking RC202609030955226516

3. Update: Cancel button inconsistent across pages

For orders with an assigned supplier, "Cancel" doesn't work from the Booking Details page, but works fine from the Order page directly.

Suggestion: Make cancel work the same way on both pages, or show a clearer message on Booking Details pointing to where it can be done.

The screenshot shows a web interface for a booking. At the top, there's a navigation bar with links: Home, Services, Orders, and Become a Partner. A red banner at the top left states "This order cannot be cancelled". Below this, there's a form with fields for Email (dhanamoljadoo21@gmail.com), Address (Al, Nahda, Sharjah, Nayaab Haandhi building), and Booking notes (Do not ring a bell, Just call me). A sidebar on the left shows a Stripe logo and a price of 5.25 AED. At the bottom right, there's a "Manage Booking" button.

4. Address Box in Booking Page - Change

Replace the current address cards with a compact "Home / Work / Office" selector with a down arrow, expandable to pick or manage addresses. Applies to both Add to Booking and direct Confirm Booking flows.

This mockup shows a "Contact & Service Address" section. It features a "SERVICE ADDRESS" label above a compact selector. The selector has a house icon, the text "Home", the address "Al Nahda, Sharjah, Nayaab Haandhi building", and a downward arrow. Below the selector, a small note says "Tap to switch between Home / Work / Office, or manage addresses in your profile."

Contact & Service Address

SERVICE ADDRESS

This mockup shows an expandable version of the address selector. It has a header with a house icon, the text "Home", the address "Al Nahda, Sharjah, Nayaab Haandhi building", and an upward arrow. Below the header, there are three address cards: "Home" (selected with a checkmark), "Work" (Al Qusais, Dubai, Silver Tower), and "Office" (Business Bay, Dubai, Tower B). At the bottom, there's a link "Manage addresses in profile →".

5. Bug/Suggestion: No way to unassign a supplier

Once a supplier is assigned to an order, there's no option to unassign them — only to reassign to a different supplier. If plans change (supplier unavailable, wrong assignment, etc.), there should be a simple "Unassign" option instead of being forced to pick another supplier right away.

The screenshot shows a web application interface with a modal window titled "Assign Supplier". At the top of the modal, there is a red error message: "Supplier ID is required". The modal contains two input fields: "Order ID" with the value "RC202609031125262459" and "* Supplier" with the placeholder text "Select or search for a supplier". Below the input fields are two buttons: "Cancel" and "Save". The background of the application is dimmed, showing a form with fields for "Service", "Service Date", "Service Date Start", "Service Date End", and "Contact". Below the modal, there is a section titled "Regular cleaning" with the text "Duration: 1 hour / Number of People: 1 person".

6. Add cancellation policy confirmation before cancelling

Add a "Cancellation & Refund Confirmation" box in the cancel flow — showing the fee, refund note, terms/privacy links, and a required "I agree" checkbox before "Confirm Cancellation" can be clicked. Mockup attached.
